Key skills

- [x] Python, Flask
- [x] JavaScript, React, Vite
- [x] SQL, PostgreSQL
- [x] RESTful APIs
- [x] HTML, CSS, Tailwind CSS
- [x] Object-Oriented Programming

Additional skills

- [x] Java, C++
- [x] JSON
- [x] React-Bootstrap
- [x] Material UI

Interests

- Playing music
- Cooking
- Learning new things
- Running

Certifications

- AWS Certified Solutions Architect – Associate (SAA-C03)
- AWS Certified AI Practitioner (AIF-C01)
- TryHackMe – Web Application Security

Summary

Software Engineer with a Python/Flask back end and JavaScript/React front end stack. Background in healthcare and education — comfortable communicating with non-engineers, collaborating on teams, and training people from scratch. Focused on shipping functional, user-friendly products and picking up whatever the next problem needs.

Experience

Telemetry Technician
New York Presbyterian Hospital, New York, NY *Jan 2023 - Present*

Initiate cardiac monitoring for telemetry patients at physician request. Analyze arrhythmias and communicate findings to the care team. Work with physicians and nurses to shape telemetry-related care plans. Train new hires across every part of the role until they can work independently.

Monitor Technician
One Brooklyn Health — Brookdale Hospital, New York, NY *Jan 2020 - Jan 2023*

Monitored arrhythmias and vital signs for patients in critical care. Flagged dire vital changes to physicians and nursing teams and initiated codes when required. Worked with the care team to set monitoring parameters and goals per patient.

In-Classroom Tutor
Tutor Corps — CUNY, New York, NY *Sep 2018 - Aug 2019*

Planned math lessons with the classroom teacher for 6th–8th grade classes. Worked one-on-one with students struggling with mathematics to clarify topics.

Projects

One Medical Health System Platform
React | Bootstrap 5 | Flask | Python | SQLAlchemy | Bcrypt

Web platform for physicians to add and manage patients, appointments, and orders. Built the React + Bootstrap 5 front end and a Flask REST back end, with SQLAlchemy input validation, Bcrypt auth, and session verification. User credentials flow through React Router DOM's Context Outlet.

MaMa Medical Appointment Maker
React | Tailwind CSS | Flask | PostgreSQL | SQLAlchemy | Bcrypt

Appointment scheduling tool for patients to create and track medical appointment dates and details. Built the React + Tailwind CSS front end, gated access with Bcrypt authentication in Flask, and stored patient profiles and appointment data in a Render-hosted PostgreSQL database queried through SQLAlchemy.

Education

Flatiron School, New York, NY *Apr 2023 - Jun 2024*
Full Stack Web Development — Python/Flask and JavaScript program

Baruch College — City University of New York, NY *Sep 2015 - May 2019*
B.A. Biological Sciences, Minor in Mathematics and Sociology
